PROFESSIONAL SUMMARY

Data Scientist with 4+ years of experience across SaaS and healthcare analytics. Currently contributing to national clinical data infrastructure at the Royal College of Surgeons in Ireland, building REDCap-based registry systems for stroke and thrombectomy services. Brings a strong ML and cloud engineering background from industry - including a 20% reduction in customer churn and a 39% increase in conversion rates at Teamwork - now applied to improving clinical data quality, operational reporting, and healthcare outcomes. Experienced communicating with both technical teams and clinical stakeholders.

PROFESSIONAL EXPERIENCE

Data Scientist (Healthcare Analytics) | Royal College of Surgeons in Ireland / Beaumont Hospital Dublin / Remote · 2024 – Present

- Leading the redevelopment of a national thrombectomy and stroke-care database, modernising legacy systems using REDCap to improve data integrity and clinical reporting across Irish stroke services.
- Coordinated with clinicians, IT teams, and operational stakeholders during soft rollout and validation of the new REDCap-based registry system.
- Designed scalable clinical data collection workflows, including multi-role Survey Queue configurations, conditional logic, HIPE compliance reporting fields, and SSO access for multi-site clinical staff.
- Migrated and standardized 10 years of thrombectomy data across **>10,000 records and >200 variables** (ETL Python, REDCap API); supporting GDPR-compliant, audit-ready data infrastructure.
- Developed **10+ operational dashboards** used by neuroradiology and stroke teams to monitor service performance and data quality (REDCap Reporting Tools, Tableau).
- Collaborated directly with clinical stakeholders - including consultant-level staff - to translate domain requirements into data workflows, improving data quality and system adoption.
- Led statistical analysis evaluating the impact of the PITSTOP workflow on patient arrival timelines and operational stroke-care efficiency, presenting findings to clinical and operational stakeholders
- Supporting future AI/ML initiatives for predictive analytics and clinical outcomes research

Data Scientist | Teamwork Cork, Ireland · Mar 2021 – Oct 2023

- Built and deployed ML models (Python, scikit-learn) for customer churn prediction, contributing directly to a **20% reduction in customer churn** through targeted behavioural analysis and retention strategies.
- Architected a machine learning pipeline to analyse customer behavioural data and define Product Qualified Lead (PQL) frameworks, informing product and go-to-market strategy.
- Designed and analysed A/B experiments end-to-end, including a feature enhancement that delivered a **39% increase in customer conversion rates**.
- Automated analytics reporting pipelines contributing to approximately **€500,000 in annual revenue** impact through improved business decision-making.
- Built dashboards and reporting infrastructure using AWS Athena, QuickSight, Redshift, Glue, S3, and RDS.
- Conducted ad-hoc SQL and Python analyses for Product Management and business teams; presented findings to cross-functional stakeholders in agile delivery cycles.

Lab Demonstrator | University College Cork Cork, Ireland · Sep 2019 – May 2022

- Delivered practical instruction in Python Programming, SQL, and Foundations of Computer Science to undergraduate students; supported development of analytical and technical skills.

EDUCATION

MSc in Cloud Computing 2022 – 2024

Munster Technological University, Cork, Ireland · First Class Honours (1.1)

Thesis: [Cloud-Powered Analytics: Evaluating Psychiatric Drug Efficacy through Customer Sentiment and Clinical Data](#)

BSc (Hons) in Data Science & Analytics 2018 – 2022

University College Cork, Cork, Ireland · First Class Honours (1.1) - Top of Class - Quercus Scholar Award

Thesis: [Handling Unusual Cases - OLS Linear Regression vs Robust Regression](#)

PROJECTS

Social Sentiment Dashboard · github.com/maximised/SocialMediaSentiment

Python · NLP · Streamlit · Reddit API · X API

- Built a full-stack NLP sentiment analysis dashboard in Python supporting live data ingestion from Reddit and X (Twitter) APIs, as well as user-uploaded CSVs.
- Applied VADER sentiment scoring and scikit-learn's CountVectorizer for topic extraction, surfacing trending terms, sentiment breakdowns, and time-series trend visualisations.
- Deployed as an interactive Streamlit app with configurable keyword search, post volume controls, and CSV export; designed for extensibility across additional data sources.

Sports Betting Analytics Dashboard · <https://www.datascienceportfol.io/maximised/projects/2>

Python · SQL · Tableau · Statistical Analysis · Data Visualisation

- Analysed betting transaction data across sports, channels, and customer segments to identify performance trends and revenue drivers.
- Built interactive dashboards visualising betting volume, commission, customer activity, and sport-level performance metrics.
- Performed exploratory data analysis and statistical modelling to investigate relationships between customer behaviour and betting outcomes.
- Presented findings through business-focused visualisations designed to support decision-making and anomaly detection.

SKILLS

Languages	Python, SQL, R, Java, HTML/CSS
Data Science	Machine Learning, Predictive Modelling, A/B Testing, Statistical Analysis, Data Visualisation
Cloud & Data	AWS (Athena, S3, Glue, Redshift, QuickSight, RDS, Elastic Beanstalk), PySpark, Apache Airflow, MongoDB
Clinical & BI	REDCap, ETL pipelines, HIPE reporting, GDPR-compliant data infrastructure, Diver BI
Tools	Git, Tableau, Jupyter, DBeaver, Google Analytics, RStudio

VOLUNTEER EXPERIENCE

Assistant Manager · Self Help Africa 2023

CoderDojo Instructor · CoderDojo 2019
